REACH Registration

REACH is the regulation for registration, evaluation, authorisation and restriction of chemicals. It entered into force on the 1st June, 2007 to streamline and improve the former legislative framework on chemicals in the EU.

Both new and existing substances are covered by REACH. All substances manufactured or imported into the EU in quantities greater than or equal to one tonne per year must be registered with the European Chemicals Agency (ECHA) in its central database.

In Ireland the Health and Safety Authority (HSA) and the Environmental Protection Agency (EPA) have been designated under the Chemicals Act 2008 as the competent Authorities for REACH.

The deadline for registration was 30th November, 2010. After that date it became illegal to either buy or sell chemicals which are not registered for REACH.

Chemifloc are delighted to inform you that the flocculants that we manufacture are now fully registered since November, 30th 2010.

The products include:

Aluminium Sulfate – All grades
Ferric Sulfate Solution
Ferric Aluminium Sulfate Solution
Ferric Chloride Solution

We look forward to continuing to supply you with chemicals which are fully compliant with the law. The appropriate REACH registration number(s) will appear on all relevant documentation forthwith.

Yours sincerely,

Hilary Lawless
Director
